Version 5.35

Abstract

This bibliography records books about the Internet and networking. It was started from the contents of Internet RFC 1432 by John S. Quarterman.

Title word cross-reference

#503 [Str95].

3 [Hal99, MBM+95, Wol98]. **$tuff** [Vin94b, Vin95b, Vin96].

.net [Int95g].

1 [Sta99b]. **10-Minute** [Ano97j]. **100VG** [Cos94a]. **100VG-AnyLAN** [Cos94a]. **10BASE** [IEE90, Hel98]. **10BASE-T** [IEE90, Hel98]. **10th** [Mei97]. **10x** [Ano96a]. **1100R** [Hub93]. **12** [Ano93h, Ano94-47, BU94b, Bla93c, Car93a, Dav95, Din94, Ess95, Gol93, JM95, JM96a, JM96b, JT96, LJ95, LMLJ95, Mil94b, Mil94a, Mil95a, Mil95b, Mil96a, Moh95, NCS93, Nat93b, Sto95c, Str94, Int93a, Wil94b]. **12-step** [Mat95a]. **12th** [PE95]. **13** [New95b]. **1394a** [And99]. **13th** [Int76a, Int76b]. **166MHz** [Ano96u]. **16th** [Bro96]. **17-hands** [Ano94v]. **17th** [Int76a, Int76b]. **18-hands** [Ano94w]. **18th** [IDK98]. **1967** [Ano69]. **1976** [Int76b]. **1981** [Ano81]. **1990s** [Gou90]. **1992** [Int92d]. **1993** [Lin93c]. **1993/1994** [Bla93a]. **1994** [Sto95c]. **1995** [Ano95l, Str95]. **19th**

[IEE94]. **1st** [Cai94].

2 [Ano97i, Ive95, LO99, Mor95d, PP91, Pil90, Sal95b, TK96, Tys95, Vac99]. **2.0** [Jam96b]. **2.2t** [Pot95]. **2000** [EE99, Web99, YY98]. **20th** [IEE95]. **215** [Mil94f]. **21st** [Ano94-61, BTC+95, McK94b, McK95, Sac97, Wal95b]. **22nd** [Ano99b, IEE97]. **23rd** [IEE98]. **2nd** [Ano98a, Ano99a, LB95a, LY96].

3 [HB98b, Hen99, Par93]. **3-D** [Hen99, Par93]. **31** [KSW99]. **31-August** [KSW99]. **3D** [McN95].

4.5 [Pre97b, Pre97c]. **4.x** [MK98a]. **4.X.** [MK98b, MS98, MK98c, MK98d, MK98e, MK98f]. **400** [LS98]. **4th** [Ano88a].

5 [ELB99, Mil99a]. **5.5** [Gon99]. **56Kbps** [Wil98]. **57th** [Ano97a]. **5th** [HL99, Pla94b].

6 [Web95]. **63rd** [Ano97a]. **6th** [Ano79, GRS79].

7 [Byr99]. **7-ilgan** [TI95]. **7.0-1.0** [Ano99e]. **77th** [Ano96x]. **7th** [Ass95b].

802 [BDPS85]. **802.3i** [IEE90]. **802.3i-1990** [IEE90]. **8th** [VVB85].

90's [VVB85, OO95]. **94** [Ano94-33]. **95** [Sne95c]. **'96** [ACM96, VT97, Ano97i]. **'97** [Hir97, IEE97, Ano97i]. **'98** [Hir98, KW98, NDM98]. **'99** [Ano98a, Fra99, HL99]. **9th** [Ano88a].

US$35.00, CDN$47.95. A collection of chapters written by 21 well known Internet user/authors, each of whom is an Internet "expert" in his or her own field. This book is not for the newbie or novice Internaut, but is filled with Internet tricks and secrets that will help turn a moderately experienced person into

a seasoned veteran. These are not mere tutorials, but detailed high-level essays written by visible, online personalities. Other chapters cover how to send a fax from the Internet, discussion forums, educational uses of the Internet, research, business and commerce. Well-written and presented.

[Com94b] Aldea Communications. *NetPages*. Aldea Communications, P.O. Box 188125, Carlsbad, CA 92009, USA, 1994. ISBN ???? 200 pp. LCCN ???? Of the various Internet White and Yellow pages books out there, this one looks and acts the most like a 'real' telephone book: personal listings of your name and e-mail address are free,

advertising space in the yellow pages section is available for a fee, and the book itself it distributed for free. With only a few thousand names in the first edition, this listing is hardly the most complete, but it only contains information about people who choose to be listed.

While not strictly an Internet book this tome focuses on one thing: the UNIX program sendmail, which is a huge part of how electronic mail moves around on the Internet. Mainly for system administrators, the book shows how to use every function, mode and mood of sendmail to get your e-mail where it's going. A great, if single-minded, book.

[End94] Marcus L. Endicott. The electronic traveler: Directory of tourism information sources. Technical report, ????, ????, 1994. US$50.00. From the publisher's info: As the title of this new book says, *The Electronic Traveler* is a directory of tourism information available to everyone

with a computer and a telephone: it is a guidebook to online travel information sources. It explains in plain English exactly what travel and tourism information is available on the information highway and how to access it. It covers the Internet, popular proprietary interactive systems, Computer Reservation Systems (CRSs), independent bulletin board systems (BBSs), and commercial fulltext databases.

ISBN 1-56592-061-9. xv + 170 pp. LCCN TK 5105.875 I57 E82c 1993. US$15.95. This small book focuses on choosing the best type of network connection for your personal, school or business needs, and how to get the best price for the type of access you require. Explains the differences between SLIP, PPP, ISDN, X.25 and other options. Includes an extensive list of Internet service providers. This is a single- purpose book, telling how to choose a connection and get online. It doesn't try to teach you how to use the 'net once you're there. That is graceful in its simplicity.

[FA89] Donnalyn Frey and Rick Adams. `!%@`*:: a Directory of Electronic Mail Addressing and Networks*. O'Reilly & Associates, Inc., 981 Chestnut Street, Newton, MA 02164, USA, January 1989. ISBN 0-937175-39-0. xv + 284 pp. LCCN HE6239.E54 F73 1989. US$26.95. A quick desk reference to many networks, with two pages on each one.

Frey:1993:DEM

[FA93] Donnalyn Frey and Rick Adams. *!%@:: a Directory of Electronic Mail Addressing and Networks*. O'Reilly & Associates, Inc., 981 Chestnut Street, Newton, MA 02164, USA, third edition, 1993. ISBN 1-56592-031-7. xvi + 443 pp. LCCN HE6239.E54 F78 1993. US$24.95. This book is a reference work. It details the various computer networks with gateways to the Internet. It is common to cite such works as "indispensable": in fact, most users, and even site managers, muddle along quite happily without it. Quick reference "electronic" versions exist of very similar documents, which provide the addressing schemes for the more common network and commercial service gateways. Frey and Adams have, however, put together a very complete and interesting reference, and I do suggest it to anyone managing, or using, extensive email correspondence. As a user of electronic mail, or the manager of a small Internet node or UUCP site, it would be hard to say that you "need" this book. If, however, you are at all interested in the topic of email, you will find this fascinating and useful.

Flanagan:1990:GTN

[Fla90] William A. Flanagan. *The Guide to T1 Networking.* Telecom Library Inc., 12 West 21 Street, New York NY 10010, USA, Tel: +1 212 691 8215, +1 800 LIBRARY, FAX: +1 212 691 1191, fourth edition, 1990. ISBN 0-936648-26-0. US$29.95. The T-1 trunk line technology is a standard for voice and data transmission in the US and Canada. The author introduces the subject in clear simple language and explains the various issues and terminology. Most terms are clearly explained as they are introduced; no prior understanding of telephone technology is required. The higher-speed technologies and the corresponding global standards are discussed briefly. Reference material is well organized. I recommend this book as an introduction to the subject. Table of Contents 1 What T1 Does For a Network 2 T-1 Defined Historically 3 Digital Voice 4 T-1 Circuits 5 What Equipment You Will Need At Your Office 6 How To Build a T-1 Network 7 Beyond T-1: Desktop to DS-3 8 Network Management And Control A T-1 Case Examples B Networking Acronyms C Basic Multiplexing D Global Framing Formats Index.

Flanagan:1991:FPC

[Fla91] William A. Flanagan. *Frames, Packets and Cells in Broadband Networking.* Telecom Library Inc., 12 West 21 Street, New York NY 10010, USA, Tel: +1 212 691 8215, +1 800 LIBRARY, FAX: +1 212 691 1191, 1991. ISBN 0-03-664831-7 (??checksum error??). xi + 269 pp. The author takes on the task of teaching the current state of the new data communication technologies, and does a generally excellent job of it. Chapter 1 introduces the basic concepts of packet networking, explaining that technology in detail and drawing contrasts to the T-1 TDM technology explained in The Guide to T-1 Networking by the same author. ASCII and X.25 are referred to in this chapter, with only the briefest description, so the reader should have some rudimentary knowledge of data communication. However the basic differences between packet switching and circuit switching, and between connection-oriented and connectionless transmission, are clearly explained so the reader can skip over confusing terminology without loss. Chapter 2 does an excellent job of explaining the basic concepts underlying the various types of packet, frame and cell technologies,

the relative advantages and disadvantages of each, layered protocols, the OSI reference model and says a few words about the functions of SNA, the Internet protocols, the IEEE LAN standards and Signaling System 7. Chapter 3 uses T-1 as an example to explain the SONET/STS and SDH framing technology. The reader should approach this chapter with a good understanding of T-1 synchronization. HDLC is also described briefly in this chapter. Chapter 4 explains frame relay, including the Local Management Interface, and again makes a comparison to X.25 (which is never described in detail). This is followed by an detailed explanation of the basics of FDDI (but SMT isn't covered). The MAN standards DQDB, IEEE 802.6 and SMDS, which are all closely related, are explained as a unit. ATM is described, with its relationship (or lack thereof) to SONET. The StrataCom proprietary FastPacket protocol is mentioned briefly, followed by some general design principles for light-weight protocols, with brief descriptions of XTP and HSTP. If you have the necessary background to read it, as explained above, I can recommend this book as an introduction to the new networking technologies that it covers. Table of Contents 1 Packet Overview 2 What All Packets Have In Common 3 Broadband Framing 4 Emerging Packet Technologies A Networking Acronyms B Annotated Bibliography C Time Division Multiplexing Index.

Godin:1994:IWP

[GM94b] Seth Godin and James S. McBride. *1994 Internet White Pages*. IDG Books, San Mateo, CA, USA, 1994. ISBN 1-56884-300-3. LCCN CT120 .G65 1994. US$29.95. A thick book listing about 100000 e-mail addresses. (Although that may seem like a lot, it’s not very comprehensive.) Addresses are listed by last name and are also indexed by Internet domain name. This book may be useful for finding associates’ e-mail addresses, but is probably no more useful than using one of the many net-based e-mail-address search utilities. The book is unevenly edited (I’m in there three times!) and was woefully out of date before the ink was dry.

ISBN 1-56484-055-7. xiii + 191 pp. LCCN ???? US$24.95 (ISTE members US$22.45). Based on Judi Harris' popular Mining the Internet column in The Computing Teacher journal, Way of the Ferret is designed to help you acquire the knowledge, skills, and experience necessary to locate and use resources found on the Internet. Carefully developed

analogies help users grasp basics of Telnet sessions, FTP file transfers, information location tools, file encryption, and discussion groups. Finally, 15 different types of educational telecomputing activities help you plan for integrating Internet resources into your students' academic explorations.

A catalog of hundreds of Internet resources in phone-book yellow-page format .... The Internet Yellow Pages strives to be an unmatched subject-oriented index to the Internet's resources, a lofty goal given the number of competing indexes available. Hahn and Stout do it right — this book is a resource that long-time Internet addicts and new users will enjoy equally well. Organization is intuitive and consistent. Although it does not point you to as many online resources as some other directories, the ones it points to tend to be high-quality and truly interesting sites to visit. Well-researched and well-indexed.

ISBN 0-13-010778-6. xv + 112 pp. LCCN TK5105.875.I57 K44 1993. The first edition of this book was and is available only online, from various anonymous FTP servers. This second edition is somewhat enlarged and updated, yet is still the shortest introductory Internet book.

Kehoe:1994:ZAI

[Keh94] Brendan P. Kehoe. *Zen and the Art of the Internet: a Beginner's Guide.* Prentice Hall series in innovative technology. P T R Prentice-Hall, Englewood Cliffs,

NJ 07632, USA, third edition, 1994. ISBN 0-13-121492-6. xx + 193 pp. LCCN TK5105.875.I57 K44 1994. US$23.95. This guide should give you a reference to consult if you're curious about what can be done with the Internet. It also presents the fundamental topics that are all too often assumed and considered trivial by many network users. It covers the basic utilities and information reaching other networks. An earlier, much less comprehensive version is available via FTP. Matisse Enzer says: Very friendly general overview book. Not really a how-to book, rather a Cultural Companion that explain what each type of Internet resource is, as well as the cultural and traditional uses and issues. Includes a chapter on "Things you will hear about..." this chapter explains many famous (and infamous) Internet events and entities.

ISBN 1-56592-063-5. xxiv + 543 pp. LCCN TK5105.875.I57 K86 1994. US$24.95. *Highly recommended*. Definitely a MUST for any new and not-so-new Internet users . . . . It is a complete user's guide to the Internet, covering everything from the basics, like electronic mail and newsgroups, to the newest developments. A large part of the book tells you how to find the resources you want. The second edition covers the latest developments on this rapidly-changing Internet and many new Internet tools like `Mosaic`, `pine`, `xarchie`, etc., ...

Instant gratification.– Pt. IV. Finding stuff on the net.– Pt. V. The part of tens.– Pt. VI. Resource reference. Intended as a beginners guide to the Internet includes useful sections on mail, gopher, news, ftp, etc. All in a fairly light-hearted style intended to set novices at ease. At over 350 pages, there is much information and the book is well indexed. Most of the material is oriented toward UNIX shell users, with some discussion of Winsock applications. Second edition notes: "We've updated and expanded the book, clarifying the first few chapters, expanding the coverage of WWW and other new services, and generally fixing stuff.".

This book describes how to write design and publish information on the World Wide Web. In addition to describing the HTML language itself, it provides information on using images, sounds, video, interactivity, gateway programs (CGI), forms, and imagemaps. Through the use of dozens of real-life examples, the book helps you not only learn the technical details of writing Web pages, but also teaches you how to communicate information effectively through the Web.

ternet system handbook. Addison-Wesley, Reading, MA, USA, 1993. ISBN 0-201-56741-5. xxxii + 790 pp. LCCN TK5105.875.I57I58 1993. US$40. Reprinted with corrections, January 1993. A description of the process that produces Internet Standards, and some other user level material in addition to protocol material. Essays by people involved with the Internet. Strong on protocols, weak on direction. The book is divided into four parts. The first section deals with an historical and organizational background to the Internet. The second section, written by the people who built the Internet, deals with technical aspects of the major protocols and applications of the Internet. Part three, "Infrastructure," covers issues not centrally relevant to the operation of the Internet, but supporting its use: network performance and management, backbone and node tools, directory services and operational security. The bibliographic information contained in the book overall might be worth the price alone. Quarterman's contribution is carefully and fully researched and well organized. It includes not only texts, but periodicals and online sources as well.

Malamud:1990:ANN

[Mal90] Carl Malamud. *Analyzing Novell Networks*. Van Nostrand Reinhold, New York, NY, USA, 1990. ISBN 0-442-00364-1. xv + 343 pp. LCCN TK5105.7 .M35 1990. US$37.95. Chapter 1 quickly reviews the ISO seven-layer model, explains the overall Novell architecture, and introduces the Network General Sniffer network analysis tool. Chapters 2 and 3 explain the Ethernet, Token Ring and ARCNET physical media. Chapter 4 discusses the IPX, SPX and network maintenance protocols; the author unfortunately does not explain why you DON'T want to use Novell's default Ethernet encapsulation. He also notes that IPX checksumming is disabled on the example he shows, but doesn't mention that this is usual Novell practice, or explain the implications. This chapter was written before packets greater than 512 bytes and block mode were implemented. Chapter 5 describes the NetWare operating system; the Bindery; communications utilities; file attributes, access rights, locking and synchronization; print services; job servers; and accounting. Chapter 6 describes the Message Handling Service (MHS) and some gateways between it and other type of messaging system. Chapter 7 briefly describes data organization, Btrieve, XQL and NetWare SQL. Chapter 8 describes the Netwise RPC product and its relationship to some other forms of RPC from other vendors. Chapter 9 describes the AT&T STREAMS protocol mechanism and its Novell implementation. Chapter 10 briefly describes the NetWare support for AppleTalk. Chapter 11 describes NetWare for VMS, Portable NetWare (which supersedes NetWare for VMS), and how Novell and DECnet networks can be gatewayed to each other. Chapter 12 briefly describes Novell support for WANS. Chapter 13 discusses gateways between Novell and TCP/IP, SNA (described as "not quite as nonproprietary as TCP/IP" in what is surely the understatement of the year!) NetBIOS and OSI. Much of the discussion is fairly superficial. There is, however, a good bibliography which provides references to more detailed documents. The glossary and index look serviceable. All chapters are illustrated with reproductions of Sniffer displays. Table of Contents: 1 Analyzing Networks 2 Data Links and LLC 3 Token Ring and ARCNET 4 IPX and SPX 5 NetWare Core Protocols 6 Message Handling Service 7 Data

Access 8 Remote Procedure Calls 9 STREAMS and Protocol Stacks 10 AppleTalk 11 DECnet and Portable NetWare 12 X.25 and Wide Area Networks 13 Gateways to Other Networks.

Malamud:1992:EIT

[Mal92] Carl Malamud. *Exploring the Internet: a Technical Travelogue*. P T R Prentice-Hall, Englewood Cliffs, NJ 07632, USA, August 1992. ISBN 0-13-296898-3. xi + 379 + 5 + 16 pp. LCCN TK5105.875.I57 M36 1992. US$26.95. Many fine lunches and dinners with users, administrators, and developers of the Internet in many countries around the world, with accurate technical background. Certainly the most wickedly funny of all the books about the Internet. Contains a subplot about how and why ITU and ISO do not publish their standards online.

Maloni:1994:N

[Mal94] Kelly Maloni. *netchat*. Random House, New York, NY, USA, 1994. ISBN 0-679-75814-3. 281 pp. US$19.00, CDN$25.00. Focuses on interacting with others through newsgroups mailing lists, IRC chat groups, forums and support groups — in a word, contact. Coverage is not limited to the Internet, but also the major on-line services such as AOL, CompuServe, Prodigy, and BBSs. Divided into chapters titled Cybersex, Fans, On the Fringe, Net Op-Ed, Coffee House, Identity and Support. There are several listings on where to discuss sexual matters of all kind and even perhaps meet that "special someone" waiting out there just for you.

Muller:1991:GFR

[MD91] Nathan J. Muller and Robert P. Davidson. The guide to frame relay & fast packet networking. Technical report, Telecom Library Inc., 12 West 21 Street, New York NY 10010, USA, Tel: +1 212 691 8215, +1 800 LIBRARY, FAX: +1 212 691 1191, 1991. Numerous new technologies are emerging to support wide area networking; among them are frame relay, cell relay (ATM),

SMDS, SONET, SDH, ISDN and BISDN. This confusing jumble of acronyms and technologies deserves a careful, thorough explanation. Unfortunately the authors did not rise to the occasion; instead they produced a jumble of unexplained acronyms and confused descriptions. Not recommended. Table of Contents 1 Public Network Trends 2 WAN Technologies 3 Principles of Frame Relay 4 Principles of Frame Relay ISDN 5 Principles of Cell Relay/ATM 6 Frame Relay Enablers: LANs, Fiber and their Interconnection 7 Carrier Services 8 Products and Networks 9 Network Planning and Design 10 Planning for Frame Relay 11 Managing Technology Acquisitions in a Down Economy Bibliography List of Acronyms Index.

The book is for users who will be accessing the Internet via a VAX/VMS host. It is designed for a reader who has some familiarity with personal computers but who has had little or no experience in using the VAX. It assumes that the user will be accessing the VAX using a VT-100 or better terminal or terminal emulation program. It explains how to access the VAX using a PC on the campus-wide Ethernet LAN or by modem. The book can be used as a tutorial for beginners. The novice user will find the step by step instructions, practical examples, and glossary very helpful. However, the book can also be used as a valuable resource for the more experienced user.

Mike was the Multics system-programmer at Project Mac and is personally responsible for putting two systems on the ARPAnet back when that meant hacking the OS designed and implemented a number of protocols including being working-group chair, and has been a commentator on Internet RFCs since the beginning. (He was also Dennis Ritchie's officemate before Bell Labs pulled out of Multics and Dennis had to invent UNIX, and has a personal exemption from Dijkstra to use a GOTO when, in his professional opinion as a protocol implementor, it is necessary.) This is a book on style in protocol design and the great Bromdinagian TCP vs. ISO debates. It's a nice piece of history and explains

where TCP, TELNET, FTP came from.

[Pre95b] Ruffin Prevost. *Internet insider*. Osborne/McGraw-Hill, Berkeley, CA, USA, 1995. ISBN 0-07-882084-7. xii + 284 pp. LCCN TK5105.875.I57 P747 1995. US$14.95. Collection of articles, messages, etc. originally posted on the Internet. Wild wacky and way out there. That's the only way to describe this toast to Internet's more bizarre newsgroups, mailing lists, e-mags, and WWW pages. Produced in a tabloid format, the "Insider" explores haiku written by dogs, the SNAG (Sensitive New Age Guy) movement, and the threat of America being overrun by space-lizard overlords, with lots of observations by Socks the Clinton Cat. It's all a bit much, but this is the first book on the Internet able to be understood without owning a computer.

Ross:1986:FT

[Ros86] Floyd E. Ross. FDDI — a tutorial. *IEEE Communications Magazine*, 24(5):10–17, May 1986. CODEN ICOMD9. ISSN 0163-6804. A good general introduction to FDDI techniques and terminology. You will find it easier to read if you have a fair amount of prior experience and vocabulary in network technology. The proposed applications now seem a little dated, but the basic ideas remain valid. See [Ros89].

Ross:1989:OFF

[Ros89] Floyd E. Ross. An overview of FDDI: The fiber distributed data interface. *IEEE Journal on Selected Areas in Communications*, 7(7):1043–1051, September 1989. CODEN ISACEM. ISSN 0733-8716 (print), 1558-0008 (electronic). An updated version of the same author's 1986 paper [Ros86]. This version reflects three years' more experience and goes into more detail in some areas. For this reason you may find it a little less readable as an introduction.

Steele, editors. *The New Hacker's Dictionary*. MIT Press, Cambridge, MA, USA, second edition, 1993. ISBN 0-262-68079-3. xxi + 505 pp. LCCN PN 6231 E4H3 1993. US$14.95. The New Hacker's Dictionary is a great book for learning about the various slang, jargon and customs and folklore of the 'net (as well as other lairs of the hacker.) Very silly and highly recommended. You can get it for free online (The Jargon File) at `http://www.ccil.org/jargon/jargon.html`, but the bound book makes great bathroom reading and contains silly cartoons and stuff.

Resnick:1994:IBGa

[RT94b] Rosalind Resnick and Dave Taylor. *The Internet business guide: riding the information superhighway to profit*. SAMS Publishing, Indianapolis, IN, USA, September 1994. ISBN 0-672-30530-5. xxxix + 418 pp. LCCN HD30.335 .R47 1994. US$25.00, CDN$34.95. Of the various books on doing business on the Internet this is the best one I've seen. By reading this book, you'll find out how to use the Internet to build market share, track down business leads, communicate with colleagues and search online databases, all through extensive examples and detailed case studies. The authors also explain how you can offer cost-effective customer support, and access critical information using the net. Explores the many opportunities available on the Internet, and get tips on shipping for the best deal on Internet access. For leading edge marketing strategies and bottom-line information.

Rose:1995:NS

[RT95] Candi Rose and Dirk Thomas. *net.sex*. Howard W. Sams, Indianapolis, IN 46268, USA, January 1995. ISBN 0-672-30702-2. 250 pp. US$19.99. Subtitled "Discreet Guide to the Adult Side of the Internet" it gives "Practical advice on how to access the 'adult side of the Internet"'. Indeed, it does. It's a surprisingly well-written, thoughtful and detailed guide to finding adult-oriented stuff on the 'net. Lots of insightful text and not one sleazy picture. Includes info on discussion lists, anonymity, finding dirty pictures and so on.

Shea:1994:N

[She94] Virginia Shea. *Netiquette*. Albion Books, San Francisco, CA, USA, 1994. ISBN 0-9637025-1-3. 154 pp. A unique book on network etiquette (the *do*s and *DON'T*s of online communications) .... With lots of valuable tips for beginners .... This slim book does an excellent job of helping those new to Cyberspace learn the basic tenants of network etiquette, or "netiquette". It's easy to read and loaded with interesting real-life examples. Chapters cover netiquette of e-mail and of discussion groups

as well as providing excellent netiquette guidelines for business, home and school use. Particularly useful sections cover Electronic Style (looking good online, tone of voice and signature files) and the "core rules" of the online world. One chapter covers copyright issues and another the etiquette of e-mail privacy. There's even a tiny chapter on "Love and Sex in Cyberspace". This book should be required reading for anyone collecting their Internet Learner's Permit. (You can retrieve a brief excerpt from Netiquette: "The Core Rules of Netiquette" by sending e-mail to netiquette-request@albion.com with the words "archive send core" in the subject line.).

[SMB94] Martha Stone-Martin and Laura Breeden. *51 Reasons: How We Use the Internet and What it Says About the Information Superhighway*. FARNET, Lexington, MA, USA, 1994. ISBN None. 124 pp. US$19.95. This is a unique book exploring how people and organizations in all 50 United States (plus the capitol) are using the Internet as the first stepping stone toward the Clinton administration's "information superhighway". Written as an oral narrative from the mouths of the people making these projects work, the book covers uses of the Internet in libraries, K-12 education, agriculture, economic development, government, health care and higher education. Although brief, 51 Reasons gives novel ideas for the use of the Internet and provides contact information for each of the individuals/projects mentioned.

You can get the text of the book online via gopher (gopher.cni.org:70/11/cniftp/misc/docs/farnet) and FTP (ftp.cni.org:/CNI/documents/farnet/studies/index).

[Tho95a] Brian J. Thomas. *The Internet for scientists and engineers: online tools and resources*. SPIE Optical Engineering Press, Bellingham, WA, USA, January 1995. ISBN 0-7803-1162-0, 0-8194-1806-4. xix + 450 pp. LCCN TK5105.875.I57 T48 1995. US$30. From the author's preface: "This book was written to serve three basic purposes: first, to introduce readers to the process of 'getting online'; sec-

ond, to provide a basic tutorial to primary Internet software 'tools'; and last, to point to a variety of resources compiled specifically for the professional scientist or engineer." Includes examples for Unix, Windows, and Macintosh computers. Includes excellent indices of online resources in: aerospace, agriculture, anthropology, archaeology, artificial intelligence, astronomy, biology, chemistry, computer science, electronics and electrical engineering, energy, engineering, geology, imaging, linguistics, mathematics, medicine, meteorology, oceanography, physics, security, statistics, and virtual reality.

[Twe94] Dylan Tweney. *The Traveler's Guide to the Information Highway*. Ziff-Davis Press, Emeryville, CA, USA, 1994. ISBN 1-56276-206-0. 139 pp. US$24.95. A guide to the Internet, CompuServe, Prodigy, America Online, Delphi, GEnie, and ZiffNet for CompuServe, this book is the first of its kind to feature real maps of each service, making it exceptionally easy to navigate the on-line world. There are also easy-to-follow instructions for using each one, plus tips, short-

cuts, and pointers to the best and most interesting features. A comprehensive and easy-to-use introduction to the Internet and the largest commercial on-line services.
