- [SMNF88] Ben Shneiderman, Thomas Malone, Donald Norman, and James Foley. User interface strategies '88 (videotape), 1988. US\$1,800.00. From *Computing Reviews*: “User interface strategies '88 was a two-day satellite TV course, taught October 5 and 12, 1988, and organized by Ben Shneiderman. The course features four outstanding researchers in human-computer interaction: Ben Shneiderman, Thomas W. Malone, Donald A. Norman, and James D. Foley. All four speakers are not only leading researchers in their respective areas, but also excellent communicators. This package consists of 10 hours of videotape (eight hours of lectures and two hours of discussion) and four books of supplementary materials. These materials consist of more than 400 pages and contain all the transparencies

- used in the presentations, annotated bibliographies and relevant papers (except for Malone's area), and a transcript of Norman's lectures. . . . The programming environment features the NeWS window system with pie menus, the EMACS-editor with tab windows, and a 'pseudo-scientific visualizer' for PostScript dictionaries.”
