

# What's In Extras

2018/04/17

## 1 The Extras Folder

The Extras folder<sup>1</sup> contains several sub-folders with:

- duplicates of several GUI programs installed by the MacTeX installer for those who already have a TeX distribution;
- alternates to the GUI applications installed by the MacTeX installer; and
- additional software that a TeXer might find useful.

The following sub-sections describe the software contained within them. Table (1), on the next page, contains a complete list of the enclosed software, versions, OS versions, licenses and URLs. Note: for 2018 MacTeX supports Yosemite, El Capitan, Sierra and High Sierra. Earlier versions of applications are no longer supplied in the Extras folder. Note: Applications that are marked to be useable with El Capitan and later may need to have some preferences updated to work properly.

### 1.1 Bibliography

Bibliography programs for building and maintaining BibTeX databases.

### 1.2 Browsers

A program to browse symbols used with L<sup>A</sup>TeX.

### 1.3 Editors & Front Ends

Alternative Editors, Typesetters and Previewers for TeX. These range from “WYSIWYM (What You See Is What You Mean)” to a Programmer’s Editor with strong L<sup>A</sup>TeX support.

### 1.4 Equation Editors

These allow the user to create beautiful equations, etc., that may be exported for use in other applications; e.g., editors, illustration and presentation software.

### 1.5 Previewers

Separate DVI and PDF previewers for use as external viewers with other editors.

### 1.6 Scripts

Files to integrate some external programmer’s editors with the TeX system.

### 1.7 Spell Checkers

Alternate TeX, L<sup>A</sup>TeX and ConTeXt aware spell checkers.

### 1.8 Utilities

Utilities for managing your MacTeX distribution.

## 2 In Closing

If you find the distribution useful, please consider joining TUG, <<http://tug.org/join.html>>, or the TeX User Group best for you, <<http://tug.org/usergroups.html>>. If you want to report bugs or have a problem with the MacTeX distribution please contact <<http://www.tug.org/mactex/support/>> or e-mail directly to <[mactex-support@tug.org](mailto:mactex-support@tug.org)>. If you have TeX problems, please join the TeX on Mac OS X mailing list, <<https://email.esm.psu.edu/mailman/listinfo/macosx-tex>>.

---

<sup>1</sup>Note: most applications found in Tiger folders work directly with Leopard. See Table (1) for more information.
