

**NAME**

**mpto** – extract labels in MetaPost pictures for typesetting

**SYNOPSIS**

**mpto** [-*tex*|-*troff*] *mpfile*

**DESCRIPTION**

This manual page is not meant to be exhaustive. The complete documentation for this version of T<sub>E</sub>X can be found in the info file or manual *Web2C: A TeX implementation*.

Strip *btex..etex* and *verbatimtex...etex* parts from MetaPost input file *mpfile*, converting to either T<sub>E</sub>X or Troff (T<sub>E</sub>X by default). The generated code is dumped on standard output.

**mpto** is typically called by **makempx**, not from the command line.

**OPTIONS**

**mpto** accepts the following options:

**--help** Print help message and exit.

**-tex** Assume input file contains T<sub>E</sub>X commands.

**-troff** Assume input file contains Troff commands.

**--version**  
Print version information and exit.

**SEE ALSO**

**mpost**(1), **makempx**(1).
