## Abstract

This is a very small package who provide disable ligatures for serbian languages. In serbian languages, in latin scripts, exist only `fi` and `fl` ligatures, so this package provide disable ligatures for this type of ligatures.

## 1 Introduction

This package is activate by typing `\usepackage{serbian-lig}` in preamble for your document, and provide disable ligature for same word which contains `fi` & `fl` ligatures in serbian language in latin scripts. The package request `xspace` package. The list of words you may see in document `\usepackage{lig-list}` and same words in `\usepackage{serbian-lig}` package. If you want you may me send word to [zoran.filipovic@yahoo.com](mailto:zoran.filipovic@yahoo.com) and I you put in package.

## 2 Example

Now we show same example.

**Example:** Kada je oficir sreo prefinjenu damu najfinijeg manira počeo je da vadi fleke.

If you tupe: Kada je `\oficir` sreo `\prefinjenu` damu `\najfinijeg` manira počeo je da vadi `\fleke`.

This produce: Kada je oficir sreo prefinjenu damu najfinijeg manira počeo je da vadi fleke.

So, happy serbian  $\text{\TeX}$ ing.
