

# **Title of presentation**

Author

Date and place of presentation

# Title of first page

This is an example of a  $\text{\LaTeX}$  itemize list

- first line in an itemized list
- second line in an itemized list
- third line in an itemized list

## Title of second page<sup>\*</sup>

The second page with nested, “vertically compressed” lists using the `citemize` and `cenumerate` environments.

- first line in an itemized list
- second line in an itemized list
  1. first line of numbered list
  2. second line of numbered list
- final line in itemized list<sup>†</sup>

For footnotes, the `footmisc` package, providing the options `perpage` and `symbol` is recommended.

<sup>\*</sup> footnotes are often not a good idea for a presentation    <sup>†</sup> ... it is therefore useful to write comments into a single footnote paragraph in order to save space

## Title of third page

**environment name:** `cdescription`, comparable to  $\text{\LaTeX}$ s `description` environment

**used for:** vertically compressed lists with small “titles”

## A page with two columns

Figure 1: The “CTAN T<sub>E</sub>X-lion” drawn by Duane Bibby, thanks to [ctan.org](http://ctan.org)

A final page written with the `rsli` environment

- This slide type is intended to be used for freely arranged text and graphics.
- In contrast to `psli`-slides, the contents are *not* centered vertically.
