The declaration calls for the Federal Republic of Germany (‘West Germany’) to “renounce explicitly and voluntarily the possession of atomic weapons of any kind”, and states that none of the authors is ‘ready in any way to take part in the production, the tests, or the application of atomic weapons”. See followup [vW57].

REFERENCES

The authors are members of the Committee on Political and Social Problems, Manhattan Project ‘Metallurgical Laboratory’, University of Chicago, and this report subsequently became known as ‘The Franck Report’. The report was written on 11 June 1945, one month before the first successful test of the atomic bomb at the Trinity site in New Mexico. In it, seven scientists, most of who worked on the Manhattan Project, recommend against the use of the atomic bomb on Japan, and predict a dangerous post-war nuclear arms race. This version was partially declassified in February 1946; eight fragments of text have been removed at the order of government censors. Some of that censored text was later recovered, but at least one sentence may still be missing — see the Web document “The Uncensored Franck Report (1945–1946)”, by Alex Wellerstein, dated 11 January 2012. Reprinted in [FHN+63], and in a longer form, in [Smi65, Appendix] and [Smi70b, pages 371–383].

Fernand Gigon. Formula for death. *Bulletin of the Atomic Scientists*, 16(9):359, November 1960. CODEN BASIAP. ISSN 0096-3402 (print), 1938-3282 (electronic). A sad note on the fate of decorated pilot Major Claude R. Eatherly, who flew over Hiroshima 15 minutes after the atomic bomb was dropped there, and three days later, piloted the plane that dropped an atomic bomb on Nagasaki. Eatherly’s post-war behavior and symptoms described there would likely be recognized now as post-traumatic stress disorder (PTSD).

William Lanouette. Dream machine. *Atlantic Monthly*, ??(??):35–52, 85–86, April 1983. ISSN 1072-7825 (print), 2151-9463 (electronic). A 20-page cover story about the history of the nuclear breeder reactor, a power plant designed to make more fuel than it consumes, including Szilard’s role both devising and naming the nuclear “chain reaction” in 1933 and the “breeder” in 1943. Letters and author’s replies in June, pages 6-7; July, pages 6 & 8; and August.
