tronics). URL http://www.acm.org/pubs/toc/Abstracts/0001-0782/48530.html. Comment 1 by Schlenk, Sun May 21 18:41:04 1989. Discusses two views: Programs can be derived from specs through mathematical methods (Hoare) versus verification as a social process (DeMillo, Lipton, Perlis). There is a response to this paper in CACM April 89.

Edgar T. Irons. A syntax directed compiler for ALGOL 60
Hash functions, for a key $x$ in a set $S$ of positive integers, of the form $h(x) = (C/(Dx + E)) \mod N$ are considered. Though the existence of $h$ is guaranteed, the scheme suffers from many practical problems because of exhaustive nature of the search for $h$.
