For extended FORTRAN for minicomputer programming, see Boam's work on Fortran compiler, drivers, and loader for medical application (Boa69). For the design of an incore Fortran compiler, refer to Bober70. Boddy77's Structured Fortran: with or without a preprocessor provides a comprehensive guide. Boguslavsky's Elementary Computer Programming in Fortran IV (Bog80) is a second edition of his foundational work from 1974 (Bog74). Bohrer's Statistical algorithms: Algorithm AS 90: One-sided multi-variable inference (Boh75) is a valuable resource. Boies' study on user behavior on an interactive computer system is documented in B0ies74. Boisson's Notions sur les organigrammes et sur le Fortran (Boi75) offers insights into program design and structure. Boillot's Understanding Fortran (Boi78) is a comprehensive guide to the language.
