Version 1.52

Abstract

This bibliography lists journals that accept papers written using \TeX{}, and use \TeX{} to produce the output page images without rekeying the text.

Title word cross-reference

References

[ACP02] Atmospheric Chemistry and Physics, 2002. ISSN 1680-7316. URL http://www.atmos-chem-phys.org/technical-teX.htm. European Geophysical Society. Typeset with pdfATeX. Authors are strongly encouraged to submit manuscripts in ePACS using the egs.cls style file. As a reward, page charges will be lower than for submission in other formats. In the first step, a pdf file will be produced suitable for on-line viewing. After an Internet-based discussion of the sci-
scientif contents the paper will (if accepted) be formatted in the traditional two-column layout using the same \LaTeX source.

\textbf{[APP]} \textit{Applied Mathematics and Computation.} CODEN AMHCBQ. ISSN 0096-3003 (print), 1873-5649 (electronic). North-Holland Publishing Company, Amsterdam, The Netherlands. From volume 59, number 1, November 1993, the journal cover proclaims in a fancy logo “Now accepting \LaTeX manuscripts”. Contact Victor van Beuren, Editor, Physical Sciences Journals Group, Elsevier Science Inc., 655 Avenue of the Americas, New York, NY 10010, e-mail: vvb@panix.com, for further details.

\textbf{[CJM]} \textit{Canadian Journal of Mathematics.} CODEN CJMAAB. ISSN 0008-414X (print), 1496-4279 (electronic). Completely done in \TeX since about 1988, including covers and index. The Bulletin consists of four issues of 144 pages each per year, while the Journal consists of six issues of 224 pages each. The final output is produced from \PostScript files, so the particular variation of \TeX (\LaTeX, \AMS-\TeX, \plain) isn’t important, as long as the source document can be adapted to conform to the style of each journal. A \CMSTeX style file for plain \TeX is used internally, and a \LaTeX style file is nearly complete.

\textbf{[CMB]} \textit{Canadian Mathematical Bulletin.} CODEN CMBUA3. ISSN 0008-4395 (print), 1496-4287 (electronic). The Canadian Mathematical Society employs \TeX for their typesetting, and encourages authors to submit that way. See also the note under [CJM].

\textbf{[CMP]} \textit{Current Mathematical Publications.} CODEN CUMPBW. ISSN 0361-4794. American Mathematical Society, Providence, RI, USA. Prepared completely with \TeX since 1985; issue indexes prepared with \TeX from 1983.

\textbf{[COM]} \textit{Commentationes Mathematicae Universitatis Caroliniae.} CODEN CMUCAA. ISSN 0010-2628. Charles University, Praha, Czechoslovakia. Published with \AMS-\TeX since 1990.
Articles using *amspt.sty* are accepted.

**[CPC]** *Computer Physics Communications.* CODEN CPHCBZ. ISSN 0010-4655 (print), 1879-2944 (electronic). Elsevier Science Publishers, Amsterdam, The Netherlands. \LaTeX\ format accepted for special proceedings issues.

**[INT91]** Vyacheslav M. Nesterov, editor. *Interval Computations*, 1991. ISSN 0135-4868. Box 52, St.Petersburg 195256, Russia, E-mail: nest@nit.spb.su (Internet). A refereed international journal, *Interval Computations* is the only periodical in the world devoted specifically to various aspects of reliable numerical computations based on the interval approach. It is managed by an international editorial board from Bulgaria, Germany, Japan, Russia, and the United States, and printed in
Russia. The journal includes various items in the fields of theoretical research, computer tools, applications, interdisciplinary research and other relevant areas. The IC has been prepared with \TeX{} since 1992. Recently a new style has been designed based on standard \LaTeX{} article style with changes in fonts, headings layout, running heads etc. It uses 10.8pt Baskerville for body text (the unusual font size is selected for better wedding with CM math) and horizontally-squeezed Palatino for headings. For mathematical formulae, standard Computer Modern is preserved. Proofs are made using \emph{\TeX} DVIHPLJ on a Hewlett-Packard LaserJet IIIp, and final pages are printed at 600dpi. Using \TeX{} is now under consideration. Papers are accepted in any \TeX{} variety; \LaTeX{} article.sty preferred.

\TeX{} is the preferred form for manuscript submission.

[J-AMa] \textit{Journal of Applied Mechanics.} CODEN JAMCAV. ISSN 0021-8936. \TeX{} macros available from Charles Beardsley, Managing Director of Publications, ASME, Tel: +1 212 705-7722.

[J-AMSb] \textit{Journal of the American Mathematical Society.} ISSN 0894-0347. Amer-
REFERENCES

American Mathematical Society, Providence, RI, USA. Prepared with \AmS-\TeX{} and \AmS-La\TeX{}; style files available at e-math.ams.org.

[JHE97] *Journal of High Energy Physics*, 1997. CODEN JHEPFG, JHEPAB (paper archive). ISSN 1029-8479. URL http://jhep.mse.jhu.edu/. Societa italiana di fisica, Bologna, Italy. Online journal. The paper version of the journal was discontinued at the end of 2000, but publication continues in electronic form. The master archive is hosted at the “Florence National Library, which is the Italian body officially in charge of keeping the legal archive of all editorial products published in Italy, both electronic and paper, thereby ensuring their legal validity.” See http://jhep.mse.jhu.edu/JOURNAL/IoPP_SISSA.html for details. Articles are marked up exclusively in \TeX{}, with PostScript for figures, and are available in DVI, PDF, and PostScript formats.

[JMB] *Journal of Molecular Biology*. CODEN JMOBAK. ISSN 0022-2836. Academic Press, New York, NY, USA. \La\TeX{} style files are available from the journal editors.

[JSY85] Bruno Buchberger, editor. *Journal of Symbolic Computation*, 1985. ISSN 0747-7171 (print), 1095-855X (electronic). Academic Press, New York, NY, USA. A \La\TeX{} style file for the journal is available from the publisher, and from ftp.risc.uni-linz.ac.at in the directory /pub/jsc in the files jsc.sty and jscguide.tex. The resolution is 600 dpi. The software used is PCTEX.

[JTB] *Journal of Theoretical Biology*. CODEN JTBIAI. ISSN 0022-5193. \La\TeX{} and \Bib\TeX{} style files jmb.sty and jmb.bst have been provided

REFERENCES

1873-1562 (electronic). Elsevier Science Publishers, Amsterdam, The Netherlands. \LaTeX\ format accepted.

The journal is broadly based in subject matter, covering algebra, modern analysis, and geometry/topology.

The papers will be presented via the \TeX\ mathematical typesetting language, developed by Donald Knuth. \TeX\ has become the standard for computer typesetting of mathematical publications.

Access will be provided through a variety of electronic means, including \listserv, anonymous \ftp\ and \gopher. In particular, access will be much more convenient than that provided by a conventional print journal. Because papers will be published as they are accepted by the editorial board, publication delays will be minimal.

The articles will be archived, date stamped, and maintained by the University at Albany, State University of New York. The University takes responsibility for insuring the integrity of the journal’s archive in perpetuity.

The journal will have an ISSN number and will be accessed by the major bibliographic publications in the field.

The development of this journal is being underwritten by the Office of Information Systems of the University at Albany, State University of New York.

The New York Journal will be accessible by a combination of \listserv\ and \gopher/\ftp.\n
By \listserv, we will distribute abstracts of the papers, together with instructions for retrieving them via \ftp\ and \gopher.\n
The abstracts will be available on four separate \listserv\ lists: one will distribute abstracts for every paper. The other three are specialty lists, giving abstracts for papers in algebra, analysis and geometry/topology, respectively. The reader may, of course, subscribe to any combination of these lists.

[PAM] *Proceedings of the American Mathematical Society*. CODEN PAMYAR. ISSN 0002-9939 (print), 1088-6826 (electronic). American Mathematical Society, Providence, RI, USA. Use of \AMSTeX\ began in 1983; completely in \AMSTeX\ and \AMS-
LATeX since late 1986; style files available at e-math.ams.org.

**PRA** *Physical Review A*. CODEN PLRAAN. ISSN 1050-2947 (print), 1094-1622, 1538-4446, 1538-4519. American Physical Society, Ridge, NY 11961, USA. \LaTeX{} format accepted.

**PRB** *Physical Review B*. CODEN PRBMDO. ISSN 0163-1829. American Physical Society, Ridge, NY 11961, USA. \LaTeX{} format accepted.

**PRC** *Physical Review C*. CODEN PRV-CAN, PRDOF8. ISSN 0556-2813, 1089-4918. American Physical Society, Ridge, NY 11961, USA. \LaTeX{} format accepted.

**PRD** *Physical Review D*. CODEN PRVDAQ. ISSN 0556-2821 (print), 1089-4918 (electronic), 1538-4500. American Physical Society, Ridge, NY 11961, USA. \LaTeX{} format accepted.

**PREb** *Physical Review E*, Statistical physics, plasmas, fluids, and related interdisciplinary topics. CODEN PLEE8. ISSN 1539-3755 (print), 1550-2376 (electronic). American Physical Society, Ridge, NY 11961, USA. \LaTeX{} format accepted.

**PRRec** *Physics Reports*. CODEN PRPLCM. ISSN 0370-1573. Elsevier Science Publishers, Amsterdam, The Netherlands. \LaTeX{} format accepted on an experimental basis.

**QAM** *Quarterly of Applied Mathematics*. CODEN QAMAAY. ISSN 0033-569X. Brown University, Providence, RI, USA.
