

NAME

`pooltype` – display a WEB pool file

SYNOPSIS

pooltype *pool_file_name*

DESCRIPTION

This manual page is not meant to be exhaustive. The complete documentation for this version of T_EX can be found in the info file or manual *Web2C: A TeX implementation*.

The **pooltype** program translates a (program-oriented) WEB string pool file to a (human-oriented) text file.

The *pool_file_name* must be complete; no adding of default extensions or path searching is done.

SEE ALSO

tangle(1).

AUTHORS

Donald E. Knuth wrote the program and originally ported it to Unix. It was published as part of the *T_EXware* technical report, available from the T_EX Users Group.
