## A Tutorial for Poster Creation with Tcolorbox

### Poster Tutorial #1

Welcome to the poster tutorial!

We start at the very begin with an empty poster.

In this tutorial, we use A3 sized paper in landscape format which can be set up with the `geometry` package. Naturally, we need the `tcolorbox` package with at least the `poster` library loaded.

At begin, we only choose the number of columns (4) and rows (5) and we display a help grid.

```
\documentclass[12pt]{article}
\usepackage[a3paper,landscape]{geometry}
\usepackage[poster]{tcolorbox}
\pagestyle{empty}

\begin{document}
\begin{tcbposter}[
  coverage = {spread},
  poster   = {showframe,columns=4,rows=5},
]
% Here, we insert the poster content later
\end{tcbposter}
\end{document}
```

# L<sup>A</sup>T<sub>E</sub>X Poster

## Poster Tutorial #2

Now, we put in some fancy settings to the poster coverage.  
Also, some more packages are loaded for the future poster content.

```
\documentclass[12pt]{article}
\usepackage[a3paper,landscape]{geometry}
\usepackage{lipsum}
\usepackage{lmodern}
\usepackage{enumerate}
\usepackage[poster]{tcolorbox}
\tcbuselibrary{minted} % <- replace by \tcbuselibrary{listings}, if minted does not work for you
\pagestyle{empty}

\begin{document}
\begin{tcbposter}[
  coverage = {
    spread,
    interior style={top color=yellow,bottom color=yellow!50!red},
    watermark text={\LaTeX\ Poster},
    watermark color=yellow,
  },
  poster = {showframe,columns=4,rows=5},
]
% Here, we insert the poster content later
\end{tcbposter}
\end{document}
```

## Poster Tutorial #3

It is time to fill boxes into the poster environment. This is the most crucial part of your poster creation, because you have to decide about the general contents and the base design. But, as you can see in the listing below, the boxes are placed with relative positions to each other and the sizes are able to change automatically.

```

%...
\posterbox[name=title,column=1,span=3,below=top]{
  \resizebox{18cm}{!}{\bfseries\Huge My Important Project}\[3mm]
  Hans.Mustermann@deephought.university
}

\posterbox[adjusted title=References]{name=references,column=2,span=1.5,above=bottom}{}
\posterbox[adjusted title=Process]{name=process,column=2,span=2,above=references}{}
\posterbox[adjusted title=Project Description]{name=project,
  sequence=1 between title and bottom then 2 between title and process}{}

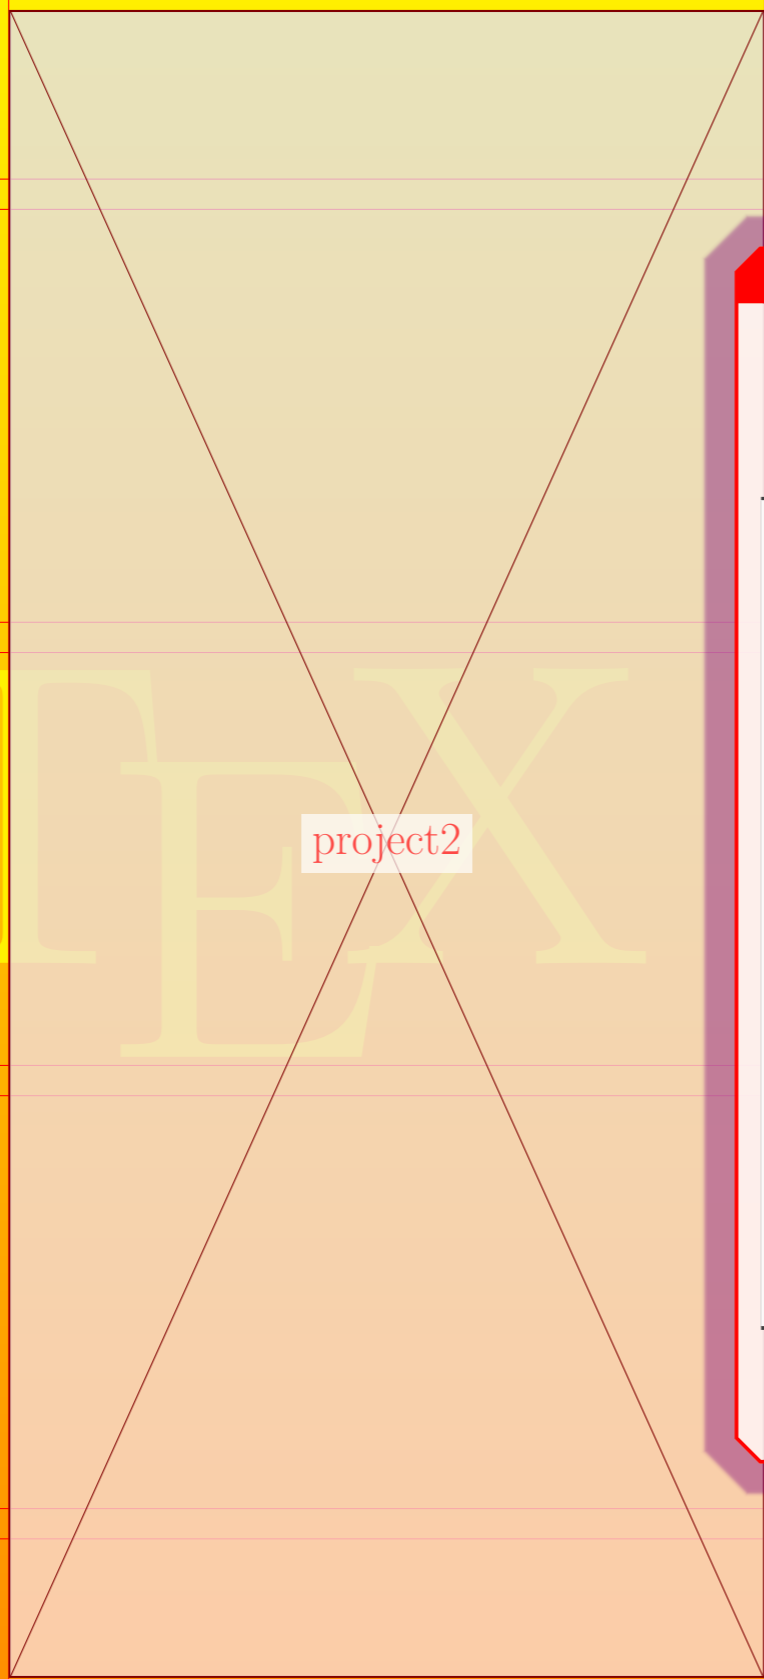

\posterbox[adjusted title=Central Picture]
{name=picture,column=3,between=title and process}{}

\posterbox[adjusted title=Core Algorithm]
{name=algorithm,column=4,between=top and references}{}

\posterbox[adjusted title=Contact]
{name=contact,column*=4,span=1.5,between=process and bottom}{}
%...

```

The project box is made breakable. Note the two parts project1 and project2 where the second part is denoted by a placeholder.

## Poster Tutorial #4

As next step, we choose some nice settings for all the boxes. These global settings are applied using the `boxes` option of the poster.

Also, we do not need the auxiliary frame lines anymore and we set `showframe=false`.

```
%...
\begin{tcbposter}[
  coverage = {
    spread,
    interior style={top color=yellow,bottom color=yellow!50!red},
    watermark text={\LaTeX\ Poster},
    watermark color=yellow,
  },
  poster   = {showframe=false,columns=4,rows=5},
  boxes    = {
    enhanced standard jigsaw,sharp corners=downhill,arc=3mm,boxrule=1mm,
    colback=white,opacityback=0.75,colframe=blue,
    title style={left color=black,right color=cyan},
    fonttitle=\bfseries\Large\scshape
  }
]
%...
```

Process

## Project Description

### Poster Tutorial #5

We make the title box different from the other boxes by removing everything except the background. Also, two pictures are added left and right which should be seen as logos or similar things.

```
%...
\posterbox[blankest,interior engine=path,height=3cm,
  align=center,valign=center,fontupper=\bfseries\large,colupper=red!25!black,
  underlay={
    \node[right,inner sep=0pt,outer sep=0pt] at (frame.west) {\includegraphics[height=3cm]{pink_marble.png}};
    \node[left,inner sep=0pt,outer sep=0pt] at (frame.east) {\includegraphics[height=3cm]{crinklepaper.png}};
  },
]{name=title,column=1,span=3,below=top}{
\resizebox{18cm}{!}{\bfseries\Huge My Important Project}\!\!\[3mm]
Hans.Mustermann@deephought.university
}
%...
```

## Process

LATEX POSTER

# My Important Project

Hans.Mustermann@deephought.university

Core Algorithm

Project Description

Central Picture

## Poster Tutorial #6

The references box is filled with a simple enumerate list.  
You may insert a more fancier and  $\LaTeX$ ier bibliography for your real project ...

```
%...
\posterbox[adjusted title=References]{name=references,column=2,span=1.5,above=bottom}{
  \begin{enumerate}[[1]]
    \item\label{litA} Important Authors, \textit{Important Title}
    \item\label{litB} More Important Authors, \textit{More Important Title}
    \item\label{litC} Less Important Authors, \textit{Less Important Title}
  \end{enumerate}
}
%...
```

Surely, you noted that all boxes adapt to the grown height of our references box. Maybe, you want to get some pages back to see how the box placements were done for this example.

## Project Description

### Poster Tutorial #7

We go on with the process which gets some example tikzpicture.  
Note that you always can insert additional tcolorbox options like `halign=center` to a posterbox.

```
%...
\posterbox[adjusted title=Process,halign=center]{name=process,column=2,span=2,above=references}{
  \begin{tikzpicture}[very thick,radius=2cm]
    \begin{scope}
      \path[draw=black,fill=white] (0,0) circle;
      \path[fill=red] (0,0) -- (2,0) arc [start angle=0, end angle=30];
    \end{scope}
    \begin{scope}[xshift=5cm]
      \path[draw=black,fill=white] (0,0) circle;
      \path[fill=red] (0,0) -- (2,0) arc [start angle=0, end angle=70];
    \end{scope}
    \begin{scope}[xshift=10cm]
      \path[draw=black,fill=white] (0,0) circle;
      \path[fill=red] (0,0) -- (2,0) arc [start angle=0, end angle=110];
    \end{scope}
    \begin{scope}[xshift=15cm]
      \path[draw=black,fill=white] (0,0) circle;
      \path[fill=red] (0,0) -- (2,0) arc [start angle=0, end angle=240];
    \end{scope}
  \end{tikzpicture}
}
%...
```

Nulla malesuada porttitor diam. Donec felis erat, congue non, volutpat at, tincidunt tristique, libero. Vivamus viverra fermentum felis. Donec nonummy pellentesque ante. Phasellus adipiscing semper elit. Proin fermentum massa ac quam. Sed diam turpis, molestie vitae, placerat a, molestie nec, leo. Maecenas lacinia. Nam ipsum ligula, eleifend at, accumsan nec, suscipit a, ip-

sum. Morbi blandit ligula feugiat magna. Nunc eleifend consequat lorem. Sed lacinia nulla vitae enim. Pellentesque tincidunt purus vel magna. Integer non enim. Praesent euismod nunc eu purus. Donec bibendum quam in tellus. Nullam cursus pulvinar lectus. Donec et mi. Nam vulputate metus eu enim. Vestibulum pellentesque felis eu massa.

See [3]: Quisque ullamcorper placerat ipsum. Cras nibh. Morbi vel justo vitae lacus tincidunt ultrices. Lorem ipsum dolor sit amet, consectetur adipiscing elit. In hac habitasse platea dictumst. Integer tempus convallis augue. Etiam facilisis. Nunc elementum fermentum wisi. Aenean placerat. Ut imperdiet, enim sed gravida sollicitudin, felis odio placerat quam, ac pulvinar elit purus eget enim. Nunc vitae tortor. Proin tempus nibh sit amet nisl. Vivamus quis tortor vitae risus porta vehicula.

That's all.

## Central Picture

### Poster Tutorial #8

The project is a breakable box with two parts. Nevertheless, you can fill the box like any other box. The information on how to break was already given by the placement options.

```
%...
\posterbox[adjusted title=Project Description]{name=project,
  sequence=1 between title and bottom then 2 between title and process}{
  See [\ref{litA}]: \lipsum[1]
  \begin{center}
  \tikz \draw[thick,rounded corners=8pt]
    (0,0)--(0,2)--(1,3.25)--(2,2)--(2,0)--(0,2)--(2,2)--(0,0)--(2,0);
  \quad by [\ref{litB}]
  \end{center}
  \lipsum[2-3]\par
  See [\ref{litC}]:
  \lipsum[4]
  \begin{center}
  \tikz \shadedraw [left color=red,right color=blue]
    (0,0) rectangle (2,2);
  \end{center}
  That's all.
}
%...
```

The two boxes have a *closed* appearance, because we used `enhanced standard jigsaw` as global style for all boxes. For an *open* appearance, just use `enhanced jigsaw` instead:

```
%...
\begin{tcbposter}[
%...
  boxes = {
    enhanced jigsaw,% <-----
    sharp corners=downhill,arc=3mm,boxrule=1mm,
%...
  }
]
%...
```

Vivamus quis tortor vitae risus porta vehicula.

That's all.

## Central Picture

## Poster Tutorial #9

In our example, the whole space of the `picture` box should be filled with a given picture. This is a piece of cake using a special `interior style`:

```
%...
\posterbox[adjusted title=Central Picture,
interior style={fill overzoom image=blueshade.png}]
{name=picture,column=3,between=title and process}{}
%...
```

## Central Picture

## Poster Tutorial #10

For the Algorithm, we need a `verbatim` environment. Here, `tcblisting` is used. Therefore, we cannot use a `posterbox` as usual, but we can a `posterboxenv` environment instead. Note that you would get some weird errors, if `posterbox` would have been applied.

```
%...
\begin{posterboxenv}[adjusted title=Core Algorithm,leftupper=0pt,rightupper=0pt]
  {name=algorithm,column=4,between=top and references}
\begin{tcblisting}{blankest,listing only}
\begin{tikzpicture}[very thick,radius=2cm]
  \begin{scope}
    \path[draw=black,fill=white] (0,0) circle;
    \path[fill=red] (0,0) -- (2,0)
      arc [start angle=0, end angle=30];
  \end{scope}
%...
\end{tikzpicture}
\end{tcblisting}
\end{posterboxenv}
%...
Process
```

## Core Algorithm

```
\begin{tikzpicture}[very thick,radius=2cm]
  \begin{scope}
    \path[draw=black,fill=white] (0,0) circle;
    \path[fill=red] (0,0) -- (2,0)
      arc [start angle=0, end angle=30];
  \end{scope}
\begin{scope}[xshift=5cm]
  \path[draw=black,fill=white] (0,0) circle;
  \path[fill=red] (0,0) -- (2,0)
    arc [start angle=0, end angle=70];
\end{scope}
\begin{scope}[xshift=10cm]
  \path[draw=black,fill=white] (0,0) circle;
  \path[fill=red] (0,0) -- (2,0)
    arc [start angle=0, end angle=110];
\end{scope}
\begin{scope}[xshift=15cm]
  \path[draw=black,fill=white] (0,0) circle;
  \path[fill=red] (0,0) -- (2,0)

That's all.

## Central Picture

## Poster Tutorial #11

Finally, the `contact` box is filled. But, in our example case, there is not much space for a lot of contact text. Therefore, we add `fit` to fit in the text automatically.

```
%...
\posterbox[adjusted title=Contact,fit,fit basedim=12pt]
  {name=contact,column*=4,span=1.5,between=process and bottom}{
  \lipsum[2]
}
%...
```

Our poster is finished now. Just go to the next page to see the final result.
