

**NAME**

`bg5conv` – convert a TeX document in Big 5 encoding into ‘preprocessed’ form.

**SYNOPSIS**

`bg5conv` < *infile* > *outfile*

**DESCRIPTION**

Big 5 encoding for traditional Chinese uses the characters {, }, and \ which have special meanings in T<sub>E</sub>X documents.

After processing a L<sup>A</sup>T<sub>E</sub>X 2<sub>ε</sub> document which contains Big 5 characters with `bg5conv` you need not care about these special characters.

This filter is part of the **CJK** macro package for L<sup>A</sup>T<sub>E</sub>X 2<sub>ε</sub>.

**SEE ALSO**

`sjisconv(1)`, `cefconv(1)`, `cef5conv(1)`, `cefsconv(1)`, `extconv(1)`,  
the **CJK** documentation files.
