Version 2.14

Abstract

This bibliography records books and articles on the use of graphics in TEX documents.

Kamin:1997:SPL

[KH97] Samuel N. Kamin and David Hyatt. A special-purpose language for picture-drawing. In USENIX [USE97], pages 297–310. ISBN 1-880446-89-8. LCCN QA76.7 .C663 1997. URL `http://www.usenix.org/publications/library/proceedings/dsl97/full_papers/kamin/kamin_html/kamin.html`. This paper describes FPIC, an implementation in ML of a programmable extension to a PIC-like [Ker82] language. The authors raise interesting points about the difficulty of doing this correctly in ML, and conclude that a more powerful base language (e.g., Haskell) might be more suitable. FPIC includes support for both PostScript and LaTeX output.
